Assessment criteria to be taken into account:

Content organization, cohesive devices (1 point)  
Grammar & sentence structure (1 point)  
Vocabulary related to topic and rich (1 point)  
Spelling and neatness 1 point

## ARTIFICIAL INTELLIGENCE

- Artificial Intelligence (AI) is a rapidly growing field of technology that has the potential to revolutionize various industries. AI refers to the ability of machines to perform tasks that typically require human intelligence, such as learning, reasoning, and decision making.
- 5 The technology has gained immense popularity in recent years due to its ability to automate processes and reduce human error. However, like any other technology, AI has its advantages and disadvantages.
- Advantages of AI include increased efficiency, accuracy, and productivity. With AI, machines can perform complex tasks in a fraction of the time it would take humans. This
- 10 can significantly reduce operational costs and increase output. Additionally, AI can help identify patterns and trends in large datasets that would be challenging for humans to detect, which can lead to more informed decision-making.
- Despite its benefits, AI has also several disadvantages. One of the biggest concerns is
- 15 the potential loss of jobs due to automation. As machines become more capable, they can replace humans in various industries, leading to unemployment. Another disadvantage is the lack of accountability and transparency in decision-making processes. Since AI algorithms are often complex and difficult to understand, it can be challenging to determine how a particular decision was made.

1. Answer the following questions from the text using your own words. Write complete sentences (2 points)

- a. What are the advantages of Artificial Intelligence?
- b. Which negative consequences does AI present?

2. Find a synonym in the text for these words (1 point)

Correction: \_\_\_\_\_

Clarity: \_\_\_\_\_

3. Are these sentences True or False? Justify your answer, explain and indicate the exact line where the answer is found. (1 point)

a. Unemployment is not a concern associated with AI. \_\_\_\_\_

b. AI can help identify patterns and trends difficult to find. \_\_\_\_\_

4. Underline the best option: (1 point)

a. What is one of the biggest concerns associated with AI?

- i. Potential loss of jobs due to automation
- ii. Increased accountability and transparency in decision-making
- iii. Improved accuracy in decision-making processes

b. Artificial Intelligence ....

- i. Could change the world as we know it today.
- ii. Will transform industry.
- iii. Could transform different producing fields.

5. CLOZE TEXT: Fill in the blanks with a suitable answer from the square, there are more words than you need. (1 point, 0.25 every right answer)

reduce   recycle   and   environment   behave   avoids   preserve   reuse
---

Sustainable tourism is a type of tourism that aims to (1)\_\_\_\_\_ the negative impacts of tourism on the environment and local communities. It encourages tourists to (2)\_\_\_\_\_ in responsible and respectful ways, while also supporting local economies and preserving natural resources. Sustainable tourism involves outdoor activities like hiking, wildlife watching, and cultural tours, and often (3)\_\_\_\_\_ the use of single-use plastics and other environmentally harmful practices.

By practicing sustainable tourism, we can help ensure that our travel experiences have a positive impact on the places we visit. We can support local businesses and cultures, protect natural resources, and (4)\_\_\_\_\_ the beauty of our planet for future generations.

6. Choose one of the following topics and write a 60 to 80 words text (4 points)

- a) Write about the importance of technology in Today's Digital Age.
- b) Imagine Life in 2050.
