Jobs in the Future

The future of work is changing fast. New technologies such as artificial intelligence, robotics and virtual reality are creating jobs that didn't exist a few years ago. Many traditional jobs will disappear, but new and exciting opportunities will appear. Experts believe that cooperation between people and machines will be very important in 2050, because technology will not replace humans completely. Instead, it will help workers do their jobs faster and more safely.

Some jobs will focus on improving life on Earth. For example, climate change will require specialists who protect the environment and design solutions to reduce pollution. We may have "urban farmers" who grow food in tall buildings and on rooftops in large cities, helping the planet by producing vegetables close to where people live. Another important job could be "health data analysts", professionals who study medical information to identify risks and prevent diseases before they appear. These workers will help hospitals offer better treatments and improve people's quality of life.

Other jobs will take people beyond our planet. Space tourism is becoming more popular, so "space travel guides" might help visitors enjoy safe and exciting trips to the Moon or even Mars. There could also be "asteroid miners" who search for rare materials in space to support new technologies on Earth. Engineers, pilots and technicians will all be needed to make space exploration possible.

However, not all future jobs will be high-tech. People will still need teachers, artists, nurses and psychologists, because technology cannot replace human creativity, emotional support or social skills. In fact, empathy, communication and teamwork will be essential qualities in future careers.

All in all, the jobs of the future will offer great possibilities. Young people must be ready to learn new skills throughout their lives and adapt to new challenges. The future is full of opportunities for those who are prepared to grow, collaborate and innovate.

Elaboració pròpia, 2025

1.1 Answer the following questions from the text, write complete sentences (2 points. 1 point each; correct answer 0'5 points, correct grammar and spelling 0'5 points)

- 1a. Why will urban farmers be important in the future?
- 1b. According to the text, what personal qualities will be important in future careers?

2. Find a synonym in the text for these words:(1 point, 0'5 each)

- vanish →
- chances / possibilities →

3. Underline the correct option based on the information in the text. (1 point, 0'5 each)

- **3.a.** In the future, work will involve...

- a) less technology.
- b) cooperation between humans and machines.
- c) no new job opportunities.

- **3.b.** Who might help people travel to the Moon?

- a) Urban farmers
- b) Space travel guides
- c) Health data analysts

4. Are the following sentences true or false? Underline the correct option (1 point, 0'5 each)

- **4.a.** Space tourism is not mentioned in the text. True / False
- **4.b.** Creativity will not be necessary in future jobs. True / False

5. Use of English. Choose the right option: (1 point, 0'25 each sentence)

- In 2050, robots _____ many boring jobs.

a) do b) will do c) did
